

Метод отжига в применении к задаче коммивояжера

Горбатовский Г. А., гр. 53423/1

$$f(\pi) = \sum_{i=1}^{n-1} d_{\pi(i), \pi(i+1)} + d_{\pi(n), \pi(1)}$$

</>

```
while temperature > final_temperature
```

```
1.     new_path = swap(path);
```

```
2.     delta_cost = cost_function(path) - cost_function(new_path);
```

```
3.     if exp(delta_cost/temperature) > rand;  
        path = new_path;  
     end
```

```
4.     temperature = temperature*cooling_factor;  
end
```
